Seamless tracking of medication

» With the new track and trace system from oli, every packing unit receives one uniquely assigned code (serialization).

» Every shipping case is provided with a label containing detailed information about the content of the case (aggregation).

individual product → packing unit → pallet

Track and trace systems for the pharmaceutical industry
oli packaging machines are high-performance

oli serves virtually all branches of industry:

» Pharmaceutical | Cosmetics Industries
» Food Industry
» Non-Food Industry

Our machines can be used for bottles, folded boxes, bags, products in blister packaging, canisters and, of course, your product.

The machines require little maintenance. Processing is gentle on products offering highest process safety.

oli packaging machines can easily be integrated into existing packaging lines or can be combined to operate as a fully-automatic final packaging line.

oli Track & Trace for your packaging line

» oli track & trace systems are developed in cooperation with strong partner enterprises (Laetus GmbH & Bluhm Systeme GmbH) and can be individually adapted to all customer specifications.

» Even a combination with other, already existing systems or cooperation with other partners is possible.

» Already existing oli packing machines can be retrofitted with Track & Trace components.

pack'solutions customized

oli 310
- Side Loading

Semiautomatic packaging machinery

Pharmaceutical compliant GMP, compact and space-saving design

» Suitable for all conventional types of cases or products, especially for stackable products like folding boxes, bundles, cans, bottles, etc.
» Output: suitable for up to 5 cases/min
» Case format range (L x W x H mm): 200-500 x 60-400 x 60-500 or according to customer preference

olibag 210 with olimat 1
- Side Loading

Fully automatic bag packer

Continuous product infeed ensures excellent process stability

» Suitable for all conventional types of cases or products, especially for bags, blister wraps, flat or upright products as tubes, CD covers etc.
» Output: up to 200 cycles/min, depending on product thickness or up to 20 cases or trays/min
» Case / Tray format range (L x W x H mm): 100-500 x 60-340 x 100-400 or according to customer preference

oli 210 V/R
- Pick & Place

Packaging Robot

Maximal flexibility due to double robot technology (2 axis and 4 axis technology)

» Suitable for all conventional types of cases or products, especially for suckable products like bags, tubes, blisters, folding boxes etc.
» Output: max. 100 single products/min or 20 insert movements/min Multiple loading capability feasible to increase output
» Format range: according to customer preference

oli 310 with olimat 3D
- Side Loading

Fully-automatic final packaging line

with innovative, flexible case erector. Fills American style cases upright or even horizontally.

» Suitable for all conventional types of cases or products, especially for stackable products like folding boxes, bundles, cans, bottles, etc.
» Pharmaceutical compliant design: ideal also for the cosmetic and food industries
» Output: approx. 6-8 cases/min
» Case format range (L x W x H mm): 150-400 x 120-300 x 130-390 or according to customer preference

olimat 1A Multi
- Case Erecting

Case and tray erector

Extensive format range, format is quickly changed

» Extremely flexible: Suitable for standard cases (american style), trays, folding trays, cases and trays with crash lock bottom and special cases on demand
» Output: up to 15 cases or trays/min with standard maschine, up to 25/min with special equipment
» Format range standard cases / trays: 200-400 x 100-350 x 100-250 mm (LxWxH) | folding trays: depending on blank design

oli-pal A, B, C, D
- Palletising robots

Compact palletisers

Ideal addition to final packaging lines

oli-pal A

» Suitable for American cases, trays with/without lids, buckets, bags, cans, shrink-wrapped items, etc.
» Output: up to 12 movements/min, higher performance via multi pick-up capability
» Case format range (L x W x H mm): 100 x 100 x 50 bis 600 x 400 x 500 - or according to customer preference

oli 210 with olimat 1
- Side Loading

Fully-automatic final packaging line

Pharmaceutical compliant, balcony-style design.

» Suitable for all conventional types of cases or products, especially for stackable products like folding boxes, bundles, cans, bottles, etc.
» Output: up to 20 American cases or trays/min, up to 40/min with extra equipment
» Case / Tray format range (L x W x H mm): 100 - 500 x 60-340 x 100-400 or according to customer preference

oli 210 V
- Top Loading

Fully-automatic Casepacker

Pharmaceutical compliant GMP, compact and space-efficient design

» Suitable for all conventional types of cases or products, especially for cans, bottles, folding boxes etc.
» Output: max. of 15 loading cycles/min Multiple loading capability feasible to increase output
» Format range: according to customer preference

oli-pal DLS
- Palletising robot

Compact palletiser

Loading of magazines and full pallet pick discharge from front side

» Suitable for American cases, trays with/without lids, buckets, bags, cans, shrink-wrapped items, etc.
» Output: up to 12 movements/min, higher performance via multi pick-up capability
» Case format range (L x W x H mm): 100 x 100 x 50 - 600 x 400 x 500 - or according to customer preference
